

JAN 28 2008

Application Serial No. 10/621,250

PATENT  
Docket: CU-3300**REMARKS/ARGUMENTS**

Reconsideration is respectfully requested.

As described in the specification page 25, lines 3-7, "the reference data generation section 300 is constricted to select and output one of a plurality of reference data" in the look-up table 200. Claim reads --controlling the reference data generation section to select and output one of the plurality of reference data with reference to the look-up table according to a result of the comparison--. This means that the reference data generation section (such as FIG. 13, 300) is **controlled** to --select and output one of the plurality of reference data with reference to the look-up table--. Thus, FIG. 13 is consistent with claim 13 for the reasons as described above. Withdrawal of the objection to the drawings is respectfully requested.

Claims 1-2, 13-14, and 18 have been amended to remove informalities.

Claim 2 and 14 have been amended to recite --a pulse width changed on the basis of the location of the pertinent gate driver IC--.

For the reasons above, issuance of a Notice of Allowance is respectfully requested.

Should the examiner have any remaining questions or concerns, the examiner is
